The screenshot shows a video player interface for 'Dilated cardiomyopathy'. It includes a video player with a progress bar, a transcript panel on the right, a notes panel, and assessment tools. Numbered callouts (1-6) point to specific features: 1. 'Add to playlist' button; 2. Transcript panel; 3. Assessment section; 4. Speed controls; 5. Closed captioning (CC) icon; 6. Video chapters.

- 1 Learn visually and control what comes next
- 2 Quickly scan video transcripts to sync with learning objectives
- 3 Assessments to reinforce learning objectives
- 4 Speed controls for efficient consumption
- 5 Content accessible to all via closed captioning
- 6 Video chapters allow for bite-sized learning
- + Study Schedule, Analytics Dashboard, and more!

How should I use Osmosis?

• **Prime Your Learning:** Watch videos on upcoming lecture topics before class.

• **Active Self-Directed Learning:** Make playlists, create Study Schedules, and quiz yourself on topics you are struggling with. Track your confidence and accuracy in your analytics dashboard.

• **Review:** Watch videos after class and check your understanding with assessment items.

• **Exam Prep:** Prepare for exams by creating playlists and Study Schedules to keep you motivated and on track.

How Should I Use Osmosis?

1 Follow assigned playlists from your instructors for easy reference later

2 Create Study Schedules to keep you motivated and on track

Osmosis Mobile App

Watch Osmosis videos offline and review assessment items anywhere with the Osmosis mobile app, available on both [iOS](#) or [Android](#).
