

# ProQuest One Education

# ProQuest One Education

ProQuest One Education brings together the content needed for study and research of education onto an intuitive and user-friendly interface created specifically for the discipline.

*Only ProQuest One Education....*

Education-specific user experience

Authoritative multi-format content

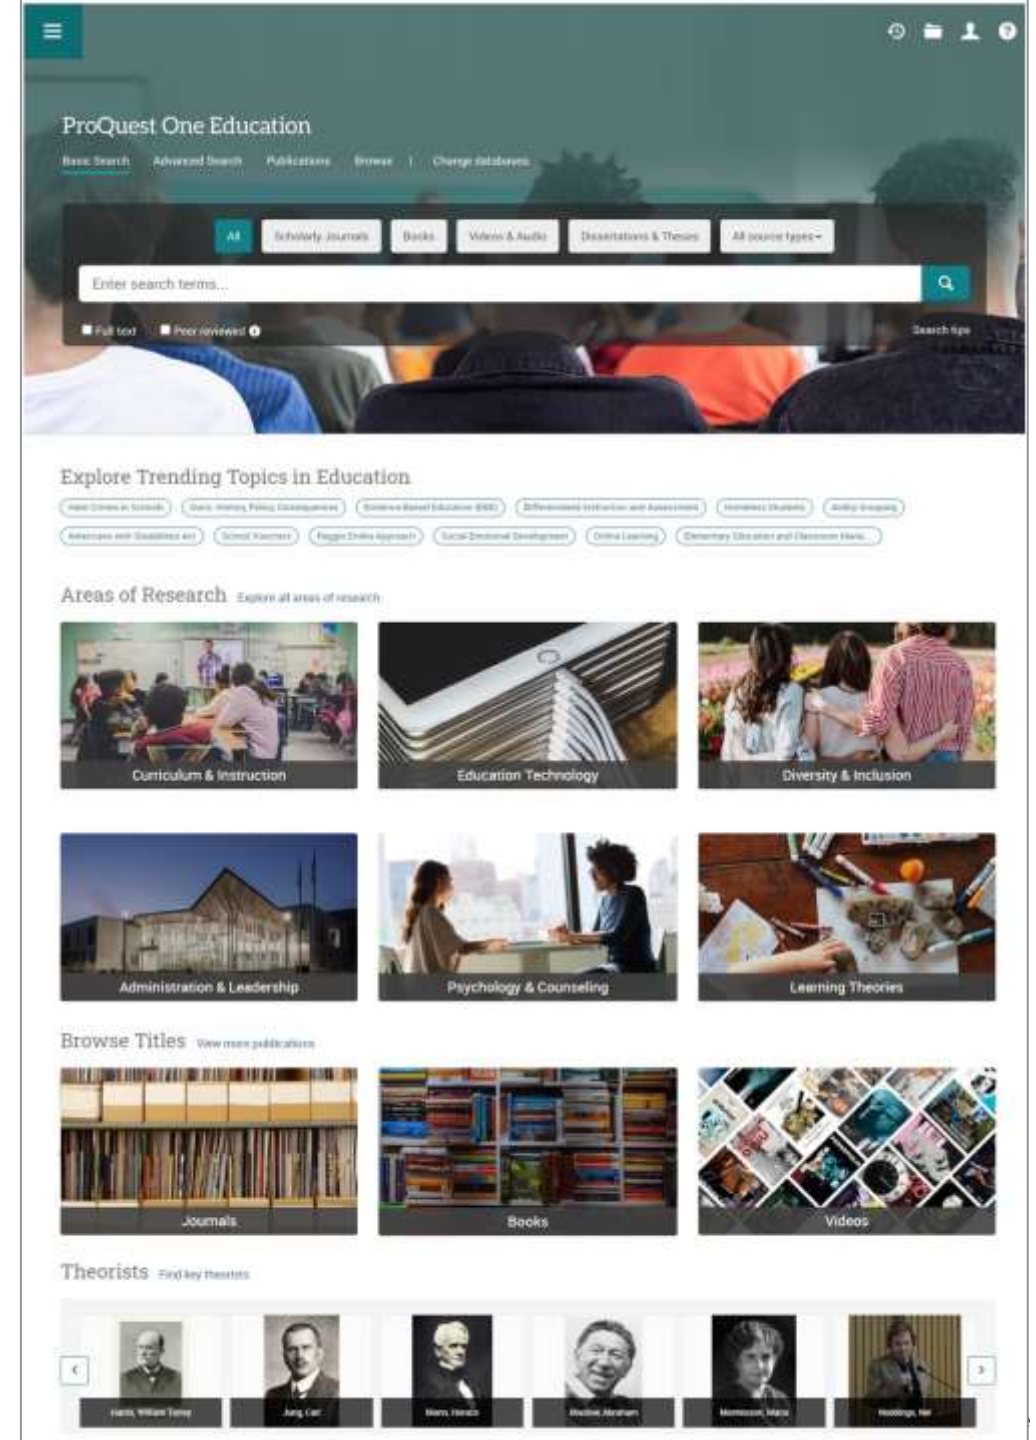

Indexed with the ERIC thesaurus

# Education-Specific User Experience

- Built on a new intuitive user experience designed specifically for the discipline
- The interface quickly guides users to the content they need to complete their research and assignments and allows them to explore topics more deeply
- Topic Pages bring together content on key areas in one place for in-depth study

# Topic Pages

Topic Pages bring together a top-level overview with links to further reading including related subjects and other relevant topic pages, and a curated selection of articles, videos, books, dissertations and more.

This provides users with one place to start their research on the most commonly studied and researched areas of the discipline, allowing them to:

- Quickly understand a topic
- Research it more deeply
- Explore it in its wider context
- Understand relationships between different topics

The screenshot shows a ProQuest One Education Topic Page for 'Classroom Discussion'. The page is organized into several sections:

- Classroom Discussion**: A header section with a search bar and a 'Search this topic' button.
- Recommended searches**: A row of buttons for 'College students', 'Elementary school students', 'Instructional effectiveness', 'Classroom techniques', 'Student participation', and 'Teaching methods'.
- PEER REVIEWED**: A section with three article cards. The first card is titled 'Cobb school board fires teacher who read controversial book to kids: After two-day hearing, tribunal had recommended against firing her over book she read to fifth graders.' The second card is 'Schools turn on lights, turn back clock: New year begins amid a heat wave made worse by attempts to keep students from the truth.' The third card is 'Students returning to culture battleground: Armed with Georgia's divisive concepts law, conservative activists take fight to classrooms.'
- RESULTS IN THE LAST 20 YEARS**: A bar chart showing the number of books published from 2004 to 2024. The y-axis is 'Number of books' (0-180) and the x-axis is 'Year - Total books'. The chart shows a general upward trend with some fluctuations.
- BOOKS**: A section with three book cards. The first is 'Education for Liberal Democracy: Using Classroom Discussion to Build Knowledge and Voice'. The second is 'Developing Historical Thinkers: Supporting Historical Inquiry for All Students'. The third is 'The Language of Interpretation: Patterns of Discourse in Discussions of Literature'.
- NEWS & MAGAZINES**: A section with three news article cards. The first is 'Chalkbeat: How Michigan schools are creating safe spaces for students to talk about the Israel-Hamas war'. The second is 'Cobb school board fires teacher who read controversial book to kids: After two-day hearing, tribunal had recommended against firing her over book she read to fifth graders.' The third is 'Schools turn on lights, turn back clock: New year begins amid a heat wave made worse by attempts to keep students from the truth.'
- DISSERTATIONS & THESES**: A section with two dissertation cards. The first is 'The Pragmatism of Evolving Social Presence in Online Discussion Forums - Educators' Perspectives - A Case Study'. The second is 'Missing Voices: A Formative Experiment to Improve Dialogue in One Online College Classroom during the COVID-19 Pandemic'.
- TOP PUBLICATIONS FOR THIS TOPIC**: A section with two publication cards. The first is 'Science and Children' with 135 articles found. The second is 'English Journal' with 125 articles found.

# Topic Pages

There are 4 groups of Topic Pages aligned to the most common areas of study and research:

## SUBJECTS

Make it easier for users to identify topics for future projects, understand common concepts more deeply, and explore connected ideas. These pages are categorized into seven specializations:

- Curriculum & Instruction
- Administration & Leadership
- Psychology & Counselling
  - US Education Policy
  - Diversity & Inclusion
  - Education Technology
  - Research Concepts
- Evaluation & Assessment
  - Student Life

## THEORIES

Allow users to explore the key theories underpinning the discipline, including their formation, and how they apply to practical teaching methods such as:

- Constructivism
- Cognitivism
- Theory of Cognitive Development
- Sociocultural Theory
- Learning by Doing

## THEORISTS

Explores the thinkers that have shaped the discipline and influenced teaching methods and education policy and laid the groundwork for future theoretical developments including:

- Jean Piaget
- Lev Vygotsky
- John Dewey
- Maria Montessori
- Carl Jung

## TEACHING METHODS

Staying up to date with the latest teaching methods makes it easier for students and researchers to understand the relationship between theory and real-world application, for example: :

- Scaffolding
- Direct Instruction
- Game Based Learning
- Flipped Learning

# Content to Support Teaching, Learning, & Research

## VIDEOS

5,500 videos including demonstrations, lectures, and documentaries as well as real-world footage of teachers and students in class

## SCHOLARLY JOURNALS

The latest scholarship and debate from over 1,000 full text scholarly journals

## BOOKS

12,500 books from publishers such as Bloomsbury, Routledge, and Harvard University Press

## DISSERTATIONS

Unique content from 110k dissertations

## ERIC CONTENT

The content from ERIC, the world's most widely used index to educational-related literature

## NEWS ARTICLES

Over 270k specially selected education related articles from a wide variety of well-known newspapers

## RESEARCH REPORTS

160,000 research reports from think tanks, governments, research organizations, and advocacy groups

# Content Highlights

- Over 1,000 full text scholarly journals including Harvard Educational Review, Education and Information Technologies, Higher Education, YC Young Children, Language Teaching, Journal of Educational Administration, and Educational Psychology Review
- A collection of over 12,500 books for comprehensive, in-depth study of education topics provide background and context for researchers and students. Includes over 500 CHOICE and RCL award winners
- More than 5,500 videos includes primary-source footage of students and teachers in actual classrooms to allow users to observe the intricacies of behavior, tone, facial expression, and body language that define effective teaching styles.

# Content Highlights

- Unique content from over 110,000 dissertations and theses helps users make new discoveries by tapping a vast amount of early scholarly content and cutting-edge thought.
- Over 270,000 specially selected education-related articles from a wide variety of well-known newspapers show theories and ideas in their broader context and give accessible ways to introduce topics to students. Titles include New York Times, The Guardian, Globe and Mail, and USA Today.
- Users can understand the impacts of education policies with access to 160,000 research reports from think tanks, governments, research organizations, and advocacy groups including the Brookings Institution, US Department of Education, RAND Corporation, and the World Bank.
- The content from ERIC, the world's most widely used index to educational-related literature, offers over one million records of journal articles, research reports, curriculum and teaching guides, conference papers, and books.

# How is ProQuest One Education Being Used?

## Research

**A Graduate Student** with a focus on policy:  
Needs to trace the history of a policy and discuss its impact and effectiveness

- They pick a policy by browsing the Topic Pages.
- They view reports to understand its implementation.
- See impact and reception in news and magazine articles
- And its effectiveness discussed in journals and dissertations.

## Teaching

**A Professor** preparing for a class on early childhood literacy:  
They want to find videos showing different ways of reading to a nursery school classroom.

- They start with the Early Literacy Development Topic Page and select a video
- They go to advanced search and choose 'emergent literacy' from the ERIC thesaurus and choose 'video' as the source type.

## Learning

**An Undergraduate Student** taking an introductory research class:  
Has to suggest an unstudied research topic, explore past methods used, and consider already studied populations.

- They get ideas from the 'trending topics' on the homepage, then view the relevant Topic Page.
- They use the research methodology and population researched facets to identify new groups or methods to use.
